

Allevo Takes qPayIntegrator To V3

The 8 years practice proven solution launched a new version this year, qPI v3.0

Press Release

Osaka, 29 October 2012: Following almost a decade of existence in the core of the Romanian financial payment systems infrastructure, the addition of numerous new features and the continuous improvement of its capabilities, Allevo qPayIntegrator v3.0 was launched this year.

Allevo is proud to announce the successful deployment of qPI's new release. In addition to ensuring the technological alignment with market trends, needs, demands, regulations and innovations, while providing several enhanced reporting facilities, qPI v3 is enabling financial institutions to interface with the new component of the Clearing & Settlement System in Romania that will go live on November 2nd, this year.

Even more, we are glad to let you know that SWIFTReady Remit conformance statement was already awarded to Allevo for qPayIntegrator 3.0.

Our qPayIntegrator customers, that for years have used Allevo's solution to efficiently control their funds transfer operations, to ensure the best protection for their business and to facilitate the provision of enhanced services and increased confidence for the ultimate beneficiaries, the banks' customers, have saluted the new version of qPI, allowing them to connect to the C&S system using also for domestic payment instructions the ISO20022 standards.

"We know from experience that the technical integration of different back-office business applications is critical to delivering effective and truly client-centric operations, leading to a wider coverage of the bank's targeted market. That's why it is our never-ending commitment to help our customer continuously improve and enhance their services and product offerings" says Sorin Guiman, General Director Allevo.

Visit Allevo at Sibos Osaka at stand 3B11 and find out more about this innovative project and how you can be part of this new world that we want to build together.
